

Unleash insights from SAP BW at unprecedented value and speed using Google BigQuery

Gain insight into your top business question

Enrich your business with machine learning

Transform your business with data-led innovation

The Challenge

Organisations are increasingly turning to Google BigQuery to make informed decisions ever more quickly and transform themselves to face modern challenges. Companies using the SAP Business Warehouse are faced with unique challenges of extending complex, vendor-proprietary data models into the cloud native concepts of Google BigQuery.

Solution

Agilexi will setup an easy to use connection between your SAP Business Warehouse and Google BigQuery. We can advise and implement on all aspects of setting up and using BigQuery with SAP BW for business usage.

Benefits

- Implement comprehensive and easy to use integration between SAP BW and Google BigQuery
- Apply Google data analytics and machine-learning capabilities to unlock the value from your SAP data
- Use existing organisations skills and data investments in a cost-effective manner
